DRAWBACK OF EXISTING SYSTEM

Limited Communication

No real-time chat with landlords or tenants for queries.

Lack of Verified Listings

Users often waste time visiting places that don't match the description.

Inadequate Filtering Options

No filter for gender-specific PGs (male/female/unisex).

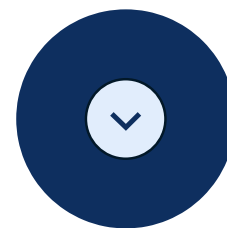

No Transparent Pricing

Prices vary randomly and aren't standardized.

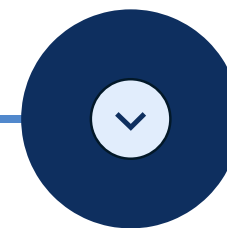

PROJECT EXPLANATION

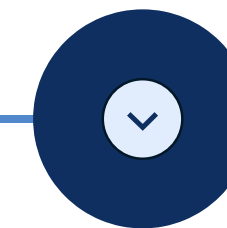

"To simplify and secure the process of finding paying guest accommodations by offering verified listings, personalized search tools, and transparent communication—empowering users to make confident, informed decisions with ease."

To help users filter and find PGs based on their specific needs—gender preference, meals, rent, distance from college/office, Wi-Fi, security, etc.

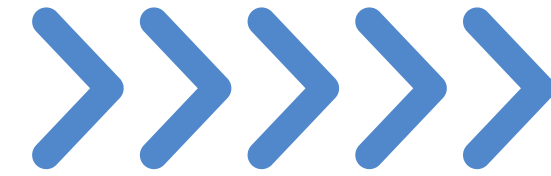

To enable direct chat or calls between users and PG owners without needing brokers, making the process faster and more transparent.

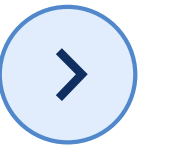

To offer genuine, verified PG listings with real photos, reviews, and ratings—reducing the chances of fraud, scams, or misleading ads.

Conclusion

Our PG hunting website makes finding a place to stay easier, safer, and smarter. By cutting out the confusion and connecting people with verified, well-matched PGs, it solves real problems for students and professionals. With modern features like online booking, reviews, and smart filters, it's more than just a listing site—it's a better way to find your next home.

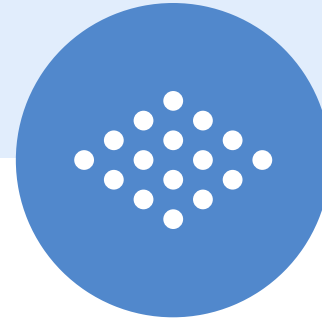

FUTURE SCOPE

Our PG renting website has strong future potential, especially in urban and tier-2 cities where students and working professionals constantly seek affordable housing. With increasing demand, the platform can expand into mobile apps, offer verified listings, and partner with colleges and companies for bulk accommodation solutions. It can also grow by integrating features like AI-based PG suggestions, tenant reviews, regional language support, and a dashboard for owners will enhance user trust and experience. Overall, it can evolve into a complete rental ecosystem beyond just PG listings.

**THANK
YOU!**
